

Ubuntu Netplan How-to

Netplan DHCP Example:

```
network:  
  version: 2  
  renderer: networkd  
  ethernets:  
    enp3s0:  
      dhcp4: true
```

Netplan Static Example:

```
network:  
  version: 2  
  renderer: networkd  
  ethernets:  
    enp3s0:  
      addresses:  
        - 10.10.10.2/24  
      nameservers:  
        search: [mydomain, otherdomain]  
        addresses: [10.10.10.1, 1.1.1.1]  
      routes:  
        - to: default  
          via: 10.10.10.1
```
