

# Command Prompt - F7 List Previous Commands

If you want to see a list of all the previous commands from your current Command Prompt session just push the F7 key to see a list of commands like below.

The screenshot shows a Windows Command Prompt window titled "C:\Windows\System32\cmd.exe". The command history list is displayed in the center of the window, listing the following commands:

- 0: dir
- 1: curl wttr.in/Denver,CO
- 2: cls
- 3: cd c:\

The command "3: cd c:\" is currently selected and highlighted with a blue background. The command prompt shows the current directory as "C:\Users\gtaylor\Desktop" and the command "cd c:\" has been entered.

Now you can use the up and down arrows to select a command from the list then hit enter to re-run it.
