

# Command Prompt - F7 List Previous Commands

If you want to see a list of all the previous commands from your current Command Prompt session just push the F7 key to see a list of commands like below.

The screenshot shows a Windows Command Prompt window titled "C:\Windows\System32\cmd.exe". The prompt is at "C:\Users\gtaylor\Desktop>cd c:\". Below the prompt, a list of previous commands is displayed, numbered 0 through 3. The list is as follows:

```
0: dir
1: curl wttr.in/Denver,CO
2: cls
3: cd c:\
```

The command "3: cd c:\" is highlighted with a blue background. The window has a standard Windows title bar with minimize, maximize, and close buttons.

Now you can use the up and down arrows to select a command from the list then hit enter to re-run it.

```
Select C:\Windows\System32\cmd.exe
C:\Users\gtaylor\Desktop>cd c:\
c:\>
```

```
0: dir
1: curl wttr.in/Denver,CO
2: cls
3: cd c:\
```

And just like that the curl command runs again

```
Select C:\Windows\System32\cmd.exe
C:\Users\gtaylor\Desktop>cd c:\
c:\>curl wttr.in/Denver,CO
Weather report: Denver,CO

  \ /      Partly cloudy
 - /"" .-. +55(53) °F
  \ ( ) .  ☒ 19 mph
 / ( _ )  9 mi
          0.0 in
```

				Wed 29 Mar			
Morning		Noon		Evening		Night	
\ /	Sunny	\ /	Sunny	\ /	Sunny	\ /	Partly cloudy
